

Wesley Li (李濬翔)

Operations Director / DevOps Director / SRE & DevOps Lead

Male · 46 (Military service completed 2004/6) | Mobile: 0925-012-208 | Email: ericly76@gmail.com |
Location: Toucheng, Yilan County | Currently employed · Available immediately

Career Objective

With 10+ years of IT operations and 7+ years of team management experience across the gaming, digital content and cloud service industries, seeking an Operations Director role to build a game service operation system with SLA of 99.95%+ and an MTTR within 30 minutes, ensuring zero-defect game launches and stable operation through CI/CD automation, database reliability operations and monitoring/alerting systems.

Professional Summary

- 10-11 years of IT operations / system architecture, 7+ years of management; led teams of up to 12 people (DBA, SRE, DevOps, MIS/Infra, Security, OP)
- Former operations lead for a gaming company (JOHNSONS GAMING) and digital content companies; hands-on experience with game service operations, app-store release process and pre-launch load testing collaboration
- Reduced project go-live cycle from 12 months to within 6 months, saving tens of millions NTD in development time and system resources
- Experienced with on-premise IDC and multi-cloud environments (AWS, GCP, Azure, Alibaba Cloud)
- Proficient in MSSQL, MySQL, PostgreSQL, MongoDB and Redis; experienced in backup/recovery, performance tuning, master-slave replication, read/write splitting and database sharding

Core Competencies

CI/CD & Automation	Jenkins, Git/GitLab, Ansible, Terraform, Walle, Shell/Python, Telegram Bot deployment notifications
Deployment & Release	Rolling/blue-green deployment planning, Build/Deploy/Rollback automation, Docker/Docker Compose/Kubernetes
Load Balancing & Edge	Nginx reverse proxy/load balancing, CDN (CloudFlare, Incapsula, Akamai, cdnetworks)
Monitoring & Alerting	Zabbix, Prometheus/Alertmanager, Grafana, Graylog, EFK, openobserve (CPU/memory/disk/traffic/network node/DB monitoring & real-time alerting)
Database Operations	MSSQL, MySQL, PostgreSQL, MongoDB, Redis; backup/recovery validation, query & write performance tuning, DB script automated deployment
Cloud & Infrastructure	AWS, GCP, Azure, Alibaba Cloud, Huawei Cloud; VMware ESXi, Hyper-V, SAN storage architecture
Operations Management	SLA/MTTR management, incident troubleshooting process, post-mortem analysis, knowledge base (Wiki), SOP, KPI performance management, budget planning & cost control

Work Experience

Photon Future — SRE / DevOps Engineer

2024/10 — Present | Taipei, Zhongzheng

- Define architecture strategy and cost control; participate in annual project planning, performance management and cross-department collaboration to reduce operational expenditure
- Continuously optimize CI/CD automation and drive AI automation initiatives; build deployment pipelines with Jenkins, Ansible and Terraform
- Establish multi-layer monitoring, alerting and log management with Zabbix, Prometheus, Grafana and openobserve for real-time service health visibility
- Operate Docker, Docker Compose and ECS containerized services with Nginx reverse proxy to ensure high availability
- Manage MySQL and PostgreSQL master-slave replication, read/write splitting, query/write performance optimization and database sharding
- Build reporting database collection, ingestion, query and optimization pipelines, plus automated routine operations (table compression, migration)

Xiangchuan Neo | Yao Technology — Team Lead / AI Entrepreneur 2024/4 — Present | Yilan, Toucheng

- Build AI-powered automation tools (Telegram Bot, AI assistants), leading the full product lifecycle from requirements, development and testing to deployment
- Provide technical consulting on system architecture, DevOps and Kubernetes

Barley Co., Ltd. — Operations Manager 2019/7 — 2024/4 (4y 10m) | Taipei, Zhongshan

- Managed a 9–12 person operations team (DBA, SRE/DevOps, MIS/Infra, Security, OP); responsible for performance management, KPI reviews, cross-department communication, annual budget planning and cost control
- Set mid/long-term departmental strategy, SOPs and talent acquisition/training plans; ensured annual and ad-hoc projects were delivered
- Collaborated with frontend/backend RD teams to build highly available services; introduced AWS, GCP, Alibaba Cloud and Kubernetes environments
- Optimized CI/CD (Jenkins, Ansible, Walle, SaltStack) automation and drove automated deployment and AI automation initiatives
- Database management: backup/recovery, query & write performance tuning, master-slave and read/write splitting, basic database sharding for MySQL, PostgreSQL, MongoDB and Redis
- Built reporting database collection/ingestion/query/optimization workflows and automated routine operations (table compression, migration) to improve efficiency and cut costs
- Established service monitoring and real-time alerting (Zabbix, Prometheus Operator, Grafana, Telegram Bot) to shorten detection and recovery time
- **Achievement: cut project go-live from 12 months to within 6 months, saving tens of millions in development time and system resources**

Wanbo Creative Technology Co., Ltd — SRE & DevOps Team Leader 2018/6 — 2019/6 (1y 1m) | Taipei, Da'an

- Led a 5–8 person SRE & DevOps team responsible for development, operations and high availability of shared and internal services
- Introduced AWS, GCP and Azure to build highly reliable, scalable, automated and secure system architecture
- Built CI/CD with Jenkins, Ansible, Docker, Docker Compose and Kubernetes for automated build, test, integration and deployment
- Established monitoring, logging and version management with Zabbix, Grafana, EFK, Prometheus Operator, GitLab and Nexus

- Managed MySQL, MongoDB and Redis databases and automated routine operations (table compression, migration) to reduce labor and time costs
- Defined incident troubleshooting procedures and training plans; built a departmental knowledge base

JOHNSONS GAMING (Digital Content / Gaming) — Operation & DevOps Leader 2017/6 — 2018/5 | Taipei, NeiHu

- Operations lead for a gaming company, managing a 5–8 person operations team; responsible for online service stability and production issue handling
- Built automated monitoring and real-time alerting (Zabbix, Grafana, Telegram Bot) with robust supervision and debugging mechanisms
- Collaborated cross-functionally with RD, QA, Infra, InfoSec and product operations teams to ensure highly available game services
- Optimized CI/CD (Jenkins, Ansible) and Docker containerization; developed automated deployment and performance tuning
- Introduced CDN (CloudFlare, Incapsula, Akamai) and DNS Bind services to manage online service traffic

DaAi Headlines (TV broadcaster, 500+ employees) — System Engineer 2012/6 — 2017/6 (5y 1m) | Taipei, Beitou

- Built and operated digital TV broadcasting, media streaming and live-directing systems; set up SAN storage architecture (10G optical / 1G copper)
- Managed MySQL and MSSQL databases; VMware ESXi, Hyper-V virtualization, Windows Server and Active Directory environments
- Established supervision and debugging mechanisms; led IT equipment procurement evaluation and data-center operations to ensure system stability

Huashang Optoelectronics Co., Ltd. (Optoelectronics, 500+ employees) — Assistant Manager 2005/3 — 2012/6 (7y 4m) | Taoyuan, Daxi

- Managed a production and QC team of 13+ people; performance management, budget planning, SOP development and talent development
- Improved yield and process efficiency using SPC statistical process control; introduced automation and online management systems
- Built cross-department communication, cost control and mid/long-term strategic planning capabilities

Education

- Chung Yuan Christian University — Master's Program, Computer Science & Information Engineering (incomplete)
- Taiwan Hospitality & Tourism University (formerly Jingzhong College) — Junior College, International Trade
- National Toucheng Home Economics & Commercial Vocational High School — Business

Certifications

- Oracle Certified Professional (OCP) Java Developer
- ITS International Certification

Languages

- Chinese (Mandarin): Native (business fluent)

- Taiwanese (Hokkien): Fluent
- English: Able to read technical documents
- Japanese: Basic
